

HS&E COMMITTEE & CONSULTATION

The HS&E committee will meet twice a year for consultation unless the need arises in between, when another meeting will be scheduled.

The HS&E committee shall review all the safety audit forms during the period between committee meetings, and be satisfied that all the corrective action that has been specified has taken place.

They will also identify any trends so that should any accidents or conditions be repeating themselves; everyone can be informed so that special attention can be given to their prevention.
